DETAILED ACTION

Reasons for Allowance

Claims 1 and 14 are allowed. The following is an examiner's statement of reasons for allowance: applicant discloses an optical bridge having two optically active areas on two separate optical components opposing and spaced apart, and an optical waveguide extending between the optically active area with a concave cross-section and a smaller diameter near its center than at least one end. The Koji Tsukamoto reference teaches the optical bridge except for a particular shape as claimed of the optical waveguide. Applicant is correct in pointing out that the Kuhara reference cannot be used to modify Tsukamoto's invention as it would be non-obvious or impossible to implement the "balloon" technique in Tsukamoto's invention due to significant differences in structures. U.S. Patent 6,834,133 to Towle et al. teaches a convex optical solder bond. U.S. PGPub 2004/0184704 to Bakir et al. teaches an interconnecting and curved waveguide. Index-matching adhesive with concave cross-section is often used in optical fiber array. However, none of the reference suggests an obvious combination or modification to overcome the claimed subject matter. It is the examiner's opinion that the prior art of record, taken alone or in combination, fails to disclose or render obvious, an optical waveguide having a concave cross-section connecting two opposing optically active areas of two optical components, in combination with the rest of the limitations of the base claim.

Claims 2-13, 15-25, 35, and 36 are allowed as dependent claims of allowed claims 1 and 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
